

Advantages

Concrete pavers have several advantages that stem from the fact that they are precast units with variations in shape and color and from the fact that the units are relatively small and interlocking. The segmental nature facilitates variety in pattern, ease of installation and ease of maintenance and repair. The advantages fall into several categories which are listed below and enumerated on the following pages;

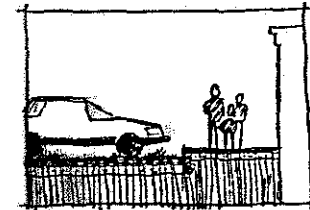

Design Variety

- Pattern variation
- Combined uses

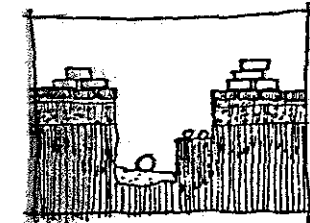

Environmental Impact

- Porosity
- Runoff control
- Erosion control
- Temperature reduction
- Visual softening

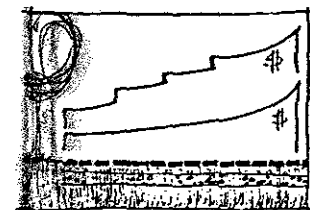

Safety

- Overall design
- Assembly

Zip and Unzip

- Maintenance and repair
- Sub-surface additions
- Redesign

Cost

- Direct costs
- External costs
